

## Acute diarrhea, Chickenpox and Influenza-like illness

Results from the electronic surveillance of communicable diseases from 08/11/2014 to 08/17/2014:

### ACUTE DIARRHEA

#### Low activity

**In metropolitan France**, last week, the incidence rate of Acute diarrhea seen in general practice was estimated at 103 cases per 100,000 inhabitants (95% CI [74 ; 132]), **below** the epidemic threshold (179 cases per 100,000 inhabitants) [1]. \*

[More information about this surveillance](#)

### CHICKENPOX

#### Low activity

**In metropolitan France**, last week, the incidence rate of Chickenpox seen in general practice was estimated at 3 cases per 100,000 inhabitants (95% CI [0 ; 7]).

**Two moderate regional clusters** were reported in Languedoc-Roussillon (35) and Corse (24). \*

### INFLUENZA-LIKE ILLNESS

#### Low activity

**In metropolitan France**, last week, the incidence rate of Influenza-like illness seen in general practice was estimated at 4 cases per 100,000 inhabitants (95% CI [0 ; 9]), **below** the epidemic threshold (83 cases per 100,000 inhabitants) [1]. \*

### ACUTE DIARRHEA

Observations for Acute diarrhea  
Week 2014w33 (in cases per 100,000 inhabitants)

Map of spatial data interpolation based on incidence rates  
at the « département » (NUTS 3) level.  
Maps available at <http://www.sentiweb.fr>

Incidence rate in blue,  
epidemic threshold in red calculated by a periodic regression model [1].  
(in cases per 100,000 inhabitants).

### CHICKENPOX

Observations for Chickenpox  
Week 2014w33 (in cases per 100,000 inhabitants)

Map of spatial data interpolation based on incidence rates  
at the « département » (NUTS 3) level.  
Maps available at <http://www.sentiweb.fr>

Sentinelles Network, Chickenpox, Metropolitan France

Incidence rate in blue.  
(in cases per 100,000 inhabitants).

National incidence rates (per 100 000 inhabitants) over the past 3 weeks	2014w33 (non consolidated)	2014w32	2014w31
	Incidence rate estimation [95% confidence interval]	Incidence rate estimation [95% confidence interval]	Incidence rate estimation [95% confidence interval]
INFLUENZA-LIKE ILLNESS	4 [0 ; 9]	5 [1 ; 9]	6 [0 ; 12]
ACUTE DIARRHEA	103 [74 ; 132]	88 [67 ; 109]	85 [65 ; 105]
CHICKENPOX	3 [0 ; 7]	7 [2 ; 12]	17 [9 ; 25]

Table 1 : Incidence rates estimation with 95% confidence interval, for each indicator, in France, over the past 3 weeks .

Regional incidence rates for week 2014w33 (per 100 000 inhabitants)	INFLUENZA-LIKE ILLNESS	ACUTE DIARRHEA	CHICKENPOX
	Incidence rate estimation [95% confidence interval]	Incidence rate estimation [95% confidence interval]	Incidence rate estimation [95% confidence interval]
