

Sentinelles network report from 10/17/2018, n° 2018w41 (data from 10/08/2018 to 10/14/2018)

ACUTE DIARRHEA

Moderate activity in general practice

In metropolitan France, last week (2018w41), the incidence rate of Acute diarrhea seen in general practice was estimated at 120 cases per 100,000 inhabitants (95% CI [103 ; 137]), **below** the epidemic threshold (143 cases per 100,000 inhabitants) [1].

At the regional level, the highest incidence rates were noted in: Pays de la Loire (147 cases per 100,000 inhabitants, 95% CI [53 ; 241]), Provence-Alpes-Côte d'Azur (147, 95% CI [66 ; 228]), Ile-de-France (140, 95% CI [61 ; 219]) and Grand Est (126, 95% CI [71 ; 181]).*

INFLUENZA-LIKE ILLNESS

Low activity in general practice

Clinical monitoring: In metropolitan France, last week (2018w41), the incidence rate of Influenza-like illness seen in general practice was estimated at 13 cases per 100,000 inhabitants (95% CI [8 ; 18]).

At the regional level, the highest incidence rates were noted in: Normandie (46 cases per 100,000 inhabitants, 95% CI [1 ; 91]), Grand Est (41, 95% CI [0 ; 118]) and Pays de la Loire (30, 95% CI [0 ; 78]).

Virological monitoring: Since week 2018w40, 34 patients were swabbed by Sentinelles physicians (21 by GPs and 13 by paediatricians). Among the samples tested (n=34), none was positive for any influenza viruses.

Among the samples tested for other respiratory viruses, 41.2% (n=14) were positive for the rhinovirus (hRV), 3.4% (n=1) were positive for the respiratory syncytial virus (RSV) and none was positive for the metapneumovirus (hMPV).

The samples were analysed by the National Center of Reference for *influenzae* viruses (Institut Pasteur Paris, Hôpitaux Civils de Lyon) and by the Laboratory of Virology of Université de Corse.

CHICKENPOX

Low activity in general practice

In metropolitan France, last week (2018w41), the incidence rate of Chickenpox seen in general practice was estimated at 5 cases per 100,000 inhabitants (95% CI [1 ; 9]).*

Few low intensity clusters were reported.

The " Réseau Sentinelles" or Sentinelles Network
(a.k.a. French Communicable Diseases Computer Network)
is a network of 1,446 physicians working throughout the metropolitan regions of France including 577 involved in the clinical surveillance activity (461 general practitioners and 116 pediatricians) enabling the achievement of weekly newsletters.
This network is developed within an agreement between Inserm, Sorbonne Université and Santé publique France.

Head of RS: Thomas Hanslik

Deputy head of RS: Thierry Blanchon

Monitoring managers: Marion Debin, Caroline Guerrisi, Louise Rossignol, Laetitia Vaillant

Information systems, biostatistics: Corentin Hervé, Titouan Launay, Cécile Souty, Clément Turbelin, Ana Vilcu

Publication: Yves Dorléans, Corentin Hervé
