

Sentinelles network report from 11/14/2018, n° 2018w45 (data from 11/05/2018 to 11/11/2018)

ACUTE DIARRHEA

Moderate to high activity in general practice

In metropolitan France, last week (2018w45), the incidence rate of acute diarrhea seen in general practice was estimated at 154 cases per 100,000 inhabitants (95% CI [136 ; 172]), **below** the epidemic threshold (158 cases per 100,000 inhabitants) [1].

At the **regional level**, the highest incidence rates were noted in: Hauts-de-France (251 cases per 100,000 inhabitants, 95% CI [171 ; 331]), Ile-de-France (242, 95% CI [107 ; 377]) and Pays de la Loire (218, 95% CI [67 ; 369]). *

INFLUENZA-LIKE ILLNESS

Low activity in general practice

Clinical monitoring: in **metropolitan France**, last week (2018w45), the incidence rate of influenza-like illness seen in general practice was estimated at 20 cases per 100,000 inhabitants (95% CI [13 ; 27]).

At the **regional level**, the highest incidence rates were reported in: Normandie (48 cases per 100,000 inhabitants, 95% CI [7 ; 89]), Hauts-de-France (38, 95% CI [8 ; 68]) and Provence-Alpes-Côte d'Azur (32, 95% CI [0 ; 73]).

Virological monitoring: since week 2018s40, date of start of monitoring, 126 samples were swabbed by the Sentinelles network practitioners (74 by general practitioners and 52 by pediatricians). Among all the samples tested (n=126), 3 (2.4%) were positive for at least one influenza virus.

Last week, 21 samples were tested. Among them, 1 (4.8%) were positive for type A influenza virus.

Regarding the other respiratory viruses, 1 (0.9%) was positive for the metapneumovirus (hMPV), 8 (7.0%) positive for the respiratory syncytial virus (RSV), and 36 (28.6%) positive for the rhinovirus (hRV). Last week, the RSV and hRV mainly circulated.

The samples were analyzed by the CNR (National Reference Centers) of respiratory infection viruses (coordinating center Institut Pasteur Paris, associated center Hôpitaux civils de Lyon), and the laboratory of Virology at the University of Corsica.

CHICKENPOX

Low activity in general practice

In metropolitan France, last week (2018w45), the incidence rate of chickenpox seen in general practice was estimated at 11 cases per 100,000 inhabitants (95% CI [6 ; 16]).

Two moderate regional clusters were noted in Provence-Alpes-Côte d'Azur (27, 95% CI [1 ; 53]) and Bretagne (22, 95% CI [0 ; 52]). *

The "Réseau Sentinelles" or Sentinelles Network
(a.k.a. French Communicable Diseases Computer Network)
is a network of 1,444 physicians working throughout the metropolitan regions of France including 579 involved in the clinical surveillance activity (463 general practitioners and 116 pediatricians) enabling the achievement of weekly newsletters.
This network is developed within an agreement between Inserm, Sorbonne Université and Santé publique France.

Head of RS: Thomas Hanslik

Deputy head of RS: Thierry Blanchon

Monitoring managers: Marion Debin, Caroline Guerrisi, Louise Rossignol, Laetitia Vaillant

Information systems, biostatistics: Corentin Hervé, Titouan Launay, Cécile Souty, Clément Turbelin, Ana Vilcu

Publication: Yves Dorléans, Corentin Hervé
